PROFESSIONAL SUMMARY

SQL-focused Data Analyst and Computer Science undergraduate with strong expertise in writing complex queries, data extraction, and database management. Proficient in JOINS, aggregations, subqueries, and window functions to analyze large datasets and generate insights. Experienced in data cleaning, transformation, and visualization using SQL, Python, and Power BI. Passionate about solving business problems using data-driven approaches.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering

Swaminarayan Siddhantha Institute of Technology, Nagpur
2023 – 2027

PROJECTS

CSV Data Analysis Agent using LangChain

- Developed an intelligent CSV data analysis agent using Python, LangChain, and Groq LLM.
- Implemented `create_csv_agent` to enable natural language interaction with CSV datasets.
- Integrated Pandas for data processing and automated query execution on structured data.
- Built functionality to answer user queries such as data summaries, filtering, and insights generation.
- Secured API access using environment variables and handled dynamic user inputs.
- Designed a user-friendly workflow for analyzing datasets without writing SQL queries manually.

Customer Data Analysis Using SQL

- Designed and managed customer database using SQL to store and organize structured data.
- Performed data cleaning and transformation on raw customer datasets to improve data quality.
- Wrote complex SQL queries using JOINS, GROUP BY, and subqueries to analyze customer behavior.
- Used window functions such as `RANK()` and `ROW_NUMBER()` to identify high-value and repeat customers.
- Generated insights on customer segmentation, purchase patterns, and retention trends.
- Created reports and dashboards by integrating SQL queries with Power BI.

Bank Transaction Analysis Using SQL

- Cleaned and transformed raw transaction datasets into structured tables using SQL.
- Performed advanced analytics using window functions such as `RANK()`, `DENSE_RANK()`, and `ROW_NUMBER()`.
- Analyzed customer spending behavior, monthly trends, and high-value transactions.
- Created optimized queries for reporting and data extraction.

TECHNICAL SKILLS

SQL Skills: Joins (INNER, LEFT, RIGHT), Subqueries, CTEs, Window Functions, Aggregations, Indexing
Programming: Python, SQL
Databases: MS SQL Server, Oracle
Data Analysis: Data Cleaning, Data Transformation, EDA
Visualization: Power BI, Matplotlib
Tools: Git, GitHub, Jupyter Notebook, VS Code

LEADERSHIP & RESPONSIBILITIES

- Led SQL-based academic projects and guided team members in writing efficient queries.
- Assisted peers in understanding database concepts, joins, and query optimization.
- Collaborated on data analysis tasks and ensured accurate data processing.
