Summary

Data Analyst with strong expertise in **Power BI, SQL, and data visualization**, experienced in developing and maintaining business intelligence solutions. Skilled in **dashboard development, SQL query optimization, data validation, and reporting**. Proven ability to deliver **data-driven insights, improve reporting efficiency, and support business decision-making**.

Technical Skills

BI Tools: Power BI, Power BI Service (Publishing, Refresh, Sharing)

Data & Querying: SQL (joins, aggregations, query optimization)

Visualization: Dashboard Development, Data Storytelling, KPI Reporting

Tools: Excel / Google Sheets (Pivot Tables, XLOOKUP, INDEX/MATCH)

Database: Data Modeling, Data Validation, Performance Tuning (basic)

Other: Python (Pandas), ETL, Data Cleaning

Collaboration: Stakeholder Communication, Requirement Gathering

Professional Experience

Business Analyst

Edversity by Livetech Skills

Feb 2026 – Present

Nagpur, India

- Developed and maintained **Power BI dashboards** tracking **20+ KPIs**, improving reporting efficiency by **25%**.
- Designed and optimized **SQL queries**, reducing data retrieval time by **30%**.
- Performed **data validation, QA checks, and discrepancy resolution**, ensuring 99% data accuracy across reports.
- Collaborated with stakeholders to gather requirements and deliver actionable insights for business decisions.
- Provided **technical support and troubleshooting** for dashboards and reporting issues, reducing downtime.
- Created documentation and implemented best practices for reporting and data governance.

Operations Coordinator

GXO Logistics

Dec 2024 – Jan 2026

UK

- Maintained operational dashboards and supported **weekly reporting processes**.
- Performed **manual data validation** and resolved discrepancies, improving reporting accuracy.
- Improved workflows through data-driven analysis, enhancing operational efficiency.

Customer Service Advisor

TSYS Managed Services

Aug 2024 – Nov 2024

UK

- Maintained CRM data ensuring high accuracy for reporting and KPI tracking.
- Supported performance reporting and improved visibility of customer service metrics.

Finance Intern

Arahant Play Equipment's

Sep 2021 – Aug 2022

India

- Performed financial reporting and analysis to support strategic business decisions.

Projects

Power BI Sales Dashboard & Reporting System

- Developed an interactive **Power BI dashboard** tracking sales KPIs and revenue trends.
- Published reports via **Power BI Service** with automated refresh and sharing.
- Designed SQL queries to extract and transform data for reporting purposes.
- Performed **data validation and troubleshooting**, ensuring accurate dashboard outputs.

SQL Query Optimization & Performance Tuning

- Optimized SQL queries improving performance by up to **30%**.
- Worked on joins, aggregations, and query tuning for efficient data processing.
- Ensured data accuracy through validation and consistency checks.

BI Documentation & Data Governance Framework

- Created detailed documentation for dashboards, data sources, and reporting workflows.
- Implemented basic **data governance practices** to ensure compliance and data security.
- Collaborated with stakeholders to improve usability and reporting processes.

Costco Operational & Customer Insights Analysis

- Analyzed **10,000+ retail data records** using Python (Pandas) to evaluate operational performance and customer trends; performed data cleaning, transformation, and KPI analysis.
- Developed dashboards and visualizations to identify sales trends and product performance, delivering **data-driven insights** for inventory optimization and business decision-making.

Web Scraping & Data Extraction Project

- Performed **web scraping using Python (Pandas, BeautifulSoup)** to extract and structure data from multiple web sources for analysis.
- Cleaned and transformed scraped data into structured datasets, enabling exploratory analysis and supporting data-driven insights generation.

Healthcare Data Analysis Project

- Conducted exploratory data analysis on healthcare datasets to identify trends in patient data, treatment patterns, and key performance indicators.
- Performed data cleaning, transformation, and visualization to generate **insights supporting healthcare decision-making and operational efficiency**.

Automobile Industry Data Analysis Project

- Analyzed automobile industry dataset to evaluate vehicle performance metrics such as engine size, fuel capacity, and efficiency using Python (Pandas).
- Performed data aggregation and comparative analysis to identify trends across vehicle types, supporting insights on performance and market patterns.
